## **DETAILED ACTION**

### ***Reissue Application Declaration Defective***

The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414. The error in the formula is not described in sufficient detail as to how the structure is erroneous/incomplete.

### ***Abstract Objected To***

The abstract of the disclosure is objected to because it does not disclose the correct formula of the compound now claimed. Correction is required. See MPEP § 608.01(b).

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 the word "compounds" is confusing, since only one compound is disclosed. It is not clear to whom the compound is administered. It is not clear that the subject is in need of treatment. Amending the claim to recite "[A] method for the treatment of a tumor sensitive to the compound below in a subject in need of said treatment comprising...." will overcome this rejection.

It is not clear that claim 2 is a dependent claim. Dependent claims should begin with the word "[T]he" to make their dependent status clear. Furthermore, it is not clear why halofuginone begins with a capital "h."

Art Unit: 1614

There is no antecedent basis in claim 3 for the word "cancer." Amending the claim to recite "...wherein the tumor is a tumor in ..." will overcome this claim. Support for this recitation is inherent in the disclosure in column 17. The word "cervix" is misspelled.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-3 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3 of U.S. Patent No. 6,420,371.

Although the conflicting claims are not identical, they are not patentably distinct from each other because it would be obvious to one of ordinary skill in the art that the method of '371, which uses the instant compound for the inhibition of angiogenesis, would also be useful to treat a tumor. That is because angiogenesis is known to promote the growth of tumors and by inhibiting angiogenesis the growth of tumors would also be inhibited.
